

# Leigh Farm Advanced Course Guide.

Drive down Leigh Farm Road until you see a sign saying that only service vehicles are allowed past that point. Parking lot is on your left. The first tee is located across from the visitor's center. Leigh Farm has advanced and Recreational level disc golf courses that share many of the same holes. Six holes of the advanced course were split into two shorter holes for the Rec course. Blue baskets were used on the split holes.

## **\*\*Important Things to Remember**

1. Ignore all blue baskets when playing the advanced course.
2. Advance course tee signs with numbered silver post tops are located at the white regular tees. All baskets have two numbers. The advanced numbers are on the band and are black with gold lettering.
3. The advanced course breaks away from the recreational course after Adv 2 and Adv 6. Follow the directions below and avoid following any rec-course players to the wrong hole.
4. The silver baskets are extras that are meant to provide some variety and additional challenge.

## **Fairway descriptions and distances from shortest tee.**

Adv1 -261/335 feet- Throw to the yellow basket that is straight down the alley at the bottom of the hill. The silver alternate basket is around 75 feet to the right of the yellow basket. Throw the tight line straight at the silver basket if you dare. Follow trail to the right and cross the wood bridge for next tee.

Adv2 -355/425 feet- Par 4 Extreme dogleg left. Landing zone is just past the big pine in the middle. Be careful with your upshot because the fairway gets tighter as you approach this yellow basket. Follow trail behind the basket locations down the hill and along the creek bed.

Adv3 -200/365 feet- Par 3/4 -Straight par 3 shot to the yellow basket. Look to your right for a fenced pump station as you approach the short basket. The next tee is 200 feet from the station on the left as you walk up the gravel road. The par four alternate is a dogleg right horseshoe shaped shot to a silver basket along the right side of the gravel road. Next tee is across the gravel road. Be careful not to throw to the wrong silver basket because you may see Hole 6 tucked in woods before you get to gravel road.

Adv4 -500 /610 feet- Par 5 – Throw something that you can control and aim for the big landing zone about 215 to 300 feet into the woods. Keep your wits about you and stay in the fairway. As you approach the basket the next tee trail is on your right. Go up the stairs and across the gravel pump station road. The next tee is about 300 feet from the short pin and 190 from the long basket location.

Adv5 – 280 feet- Basket is straight down the gravel road with a slight right turn at the end. The next tee is 300 feet to your left and up on top of the big mound where the old number 7's basket was located.

Adv6 – 470/670 feet- Par 4/5 -Go big off of the top of the hill but put it in a good landing zone. Your 2<sup>nd</sup> and 3<sup>rd</sup> shot(s) will still be a challenge no matter where you land. The short yellow basket is tucked in

the woods straight ahead. A longer silver basket alternate is tucked way back in the woods along the left side. Look to your left in the woods for the next tee trail as you walk toward the silver basket.

Adv7 - 350/390 feet- Par 4 -Throw to the landing zone that is 200 to 280 feet up the middle. The shorter elevated pin is located just out in the opening near the mounds. The alt pin location is behind the big oak tree that is near the short pin. The next tee is in the open field between the mound and the woods.

Adv8 – 240/290 feet- Throw to the yellow basket that is right on the edge of the big mound. A silver basket is located on top of the big mound. A severe overthrow of the silver could make for a rough recovery of your disc. Next tee is on the end of the big mound near the new apartments.

Adv9- 260/300 feet- Straight shot with drop off in front of basket. Silver basket has a severe drop off behind it. As you walk down the hill from this tee, look to the right for the next tee pad. You will be walking back after you putt out so you may want to leave the bag.

Adv10- 285/420 feet-Par3/4- Dogleg left shot off of the mound. Walk down the hill behind the basket and look for a trail on the left side. Next tee is around 150 feet away. Alternate is played to Rec 7's basket.

Adv11- 320/430 feet- Par 4- Placement shot just around the bend at top of the hill. Yellow basket is tucked into the woods on the left. Look for next tee trail that is straight down the fairway as you approach the basket. Follow the fairway/trail and turn right at the gravel path near skinny mound. Look for the tee sign just ahead on your right. Alternate is played to 9's silver basket.

Adv12- 260/270 feet-Choose either fairway to throw to yellow basket. Look for the path on left to the next tee as you walk down the hill.

Adv13- 260/375 feet- Par 3/4- slight dogleg right to the short pin placement. The long pin is a straight to slight right throw. Look for the trails to the next tees on your right as you approach the basket locations.

Adv14- 260/300 feet - Straight shot to both pin placements. Look for path on left as you walk to the basket. The next tee path continues across Leigh Farm Rd.

Adv15- 180/230 feet- The yellow basket is short dogleg left. This hole has an extra silver basket that can be played as a longer alternative. Silver basket is dogleg right and across the gulley.

Adv16- 235/265 feet- The short yellow basket is dogleg left at the big pine on the left side. A longer silver basket alternate is on top of the ledge.

Adv17- 340/390 feet- Par 4-Throw a tight shot to a landing zone just before the barn or after it. The short pin is past the left side of the barn and the longer pin placement is more to the right. Look for the next tee path as you walk down the hill about 60 feet past the right side of the barn.

Adv18- 200/215 feet- The yellow basket will either be straight ahead in the long position or hidden in a dogleg left position. You may need to walk to the top of the hill to find this basket. Look for the farm house and visitor's center to orient yourself for the walk back to your car.
